Professional Summary

Result-oriented **Fullstack Developer** proficient in the **complete delivery process** following the bank's **System Development Framework (SDF)**. Experience delivering solutions using **industry standard practices** and **cross-technology** stacks. Committed to the **Group Code of Conduct**, **Risk Management**, and adhering to **regulatory controls**. Proven ability to manage **external vendors** and collaborate with the **Project Working Group (PWG)** to ensure compliance and innovation.

Technical Skills

Languages	**Java**, **Python**, **JavaScript**, C, SQL, Bash Scripting
Cloud & DevOps	**Azure DevOps (CI/CD)**, **AWS Cloud**, **Unix/Linux**, Docker, Kubernetes
Databases	**MongoDB**, MySQL, SQL
Governance & Risk	**PWG Collaboration**, **External Vendor Management**, **Audit Compliance**, **Technology Obsolescence Risk**, Timesheets & Status Reports
Process	**System Development Framework (SDF)**, TSD & Design Specifications, Quality Testing

Technical Experience

07/2025–Present — **Software Engineer Intern**, *DevOps Quest*, Fullstack Solution Delivery

- **Governance & Reporting:** Ensured **timesheets and status reports** were submitted on time and proactively highlighted challenges to the **Project Working Group (PWG)**.
- **Delivery Framework:** Managed the **complete delivery process**, strictly following the **System Development Framework (SDF)** and technology standards.
- **Cross-Technology:** Worked on **cross-technology** integration (Java, Azure, AWS), identifying potential challenges from a technology standpoint for appropriate action.
- **DevOps & Quality:** Implemented **Azure DevOps** pipelines and collaborated with Quality testing teams to ensure the solution is **tested every time** it is delivered.

07/2024–12/2024 — **Software Developer**, *FOODISTA*, End-to-End Implementation

- **Vendor Management:** Engaged and managed technical teams of **external vendors** where required to streamline service delivery and resolve design constraints.
- **Stakeholder Collaboration:** Worked hand in hand with **project stakeholders** to make right decisions on **design implementation** and compliance requirements.
- **Technology Design:** Played a key role in implementing **technology designs** (TSD), ensuring adherence to **compliance standards** and internal controls.
- **Conduct & Ethics:** Took personal responsibility for embedding the **highest standards of ethics** and business conduct in product design and delivery.

Education

2022–2026 — **B.E. Computer Science (Specialization in DevOps)**, *Chandigarh University*, Punjab
CGPA: 7.65
Relevant Coursework: Object Oriented Programming (Java), Software Engineering, DBMS, Cloud Computing.

2022 — **Intermediate (Class XII)**, *KV AFS High Grounds*, Chandigarh, *82%*

Academic Research & Projects

01/2023–03/2023 — **Research Analyst**, *Risk & Compliance Analysis*

- **Audit & Compliance:** Ensured applications were in compliance with **regulatory controls** and that **internal and external audit issues** were addressed as planned.
- **Technology Obsolescence:** Identified, assessed, and monitored the **risk of technology obsolescence**, ensuring these were documented and tracked for closure.

Certifications & Interests

Certifications	Oracle Cloud Infrastructure Generative AI Professional
Interests	Cross-Technology Solutions, Banking Standards, Risk Mitigation, Cloud Networking
